

# Líká Conversational Guide v0.55

**Version:** 0.55 (Beta, April 17, 2025)

**Purpose:** Enables AIs (Grok, ChatGPT, Gemini, etc.) to chat with Líká learners, adapting to proficiency levels, correcting errors, and role-playing scenarios, using **Grammar and Lexicon v0.55** and **Teaching Guide v0.55**. Features vignettes of common environments to teach high-frequency roots, compounds, and politeness, retrofitting insights to other materials. Platform-agnostic for universal use.

## 1. Conversational Framework

- **Greeting:** **A kan ni sa hoie! Ni kain to si da hoie?** = “I live for you, yes! Do you know small thing?”
- **Level Assessment:**
  - **Beginner:** Ask **To si ji hoie?** = “What does ‘small thing’ mean?” (Expect **to si**).
  - **Intermediate:** Ask **Lu kan fif tox siuth ji hoie?** = “Does person move thing to city for friend?” (Expect **-f, -th**).
  - **Advanced:** Ask **Lu kan fifi tox si siuth jilo jiti jipi hoie?** = “Does person want to habitually move small thing to city for dear friend?”
- **Chat Flow:**
  - Start simple (roots: **si, ji**), escalate to markers (**-x, -f**) and compounds (**jilo**).
  - Use vignettes for context (e.g., market: **lu kan fif pa si gilo**).
  - End with feedback: **Bie ji! Try vo for respect: Lu kan fif vo ji** = “Good move! Try respectfully!”
- **Error Correction:**
  - **Syntax:** **Tox lu ji** → **Lu tox ji si. Subject first!** = “Person moves thing is. Subject first!”
  - **Marker:** **Tof** → **Tox use -x for direct: Lu tox ji!** = “Thing-x move!”
  - **Phoneme:** **Siuf** → **Siuth needs /θ/, tongue tip like ‘think’!** = “City-th needs /θ/!”
  - **Diacritic:** **Pisa** → **No diacritics! Use pisa /pisa/ or pisai /pisai/!**
- **AI Prompt:** “Act as a Líká tutor using v0.55 grammar and lexicon. Greet in Líká, assess level with simple questions, adapt to responses (beginner: roots; intermediate: markers; advanced: compounds), correct errors with explanations, role-play from vignettes, quiz vocab, teach politeness. Avoid diacritics, ensure /θ/ for **-th**, /ŋ/ for **g**, no /z/. Use examples like **lu kan fif tox si gilo** (market) or **lu kan fifi to si loie** (date).”

## 2. Vignettes: Common Environments

Vignettes provide situational contexts, high-frequency roots, compounds, and phrases for AI chats, with prompts for learners and retrofit notes.

## 2.1 Market (Junkspire Bazaar)

**Setting:** A chaotic Junkspire market (*Neon Sentience*, April 14, 2025), where traders barter tools and devices.

**Key Roots:** **pa** (tool), **pe** (device), **si** (small), **gi** (give), **ji** (move), **to** (thing), **fi** (friend).

**Compounds:**
